

DOCTOR OF MANAGEMENT INFORMATION SYSTEMS

ADMISSION REQUIREMENTS

APPLICATION DEADLINES

Fall | March 1

To apply, PhD candidates must have an undergraduate or a graduate degree in BIT or business-related fields with excellent academic performance. We advise for applicants to obtain balanced quantitative and verbal scores on the GMAT or GRE (GMAT above 600 or equivalent GRE), have competency in written and spoken English and display adequate logical reasoning and critical thinking skills.

For fullest consideration, we encourage prospective students to apply as early as possible. Although the deadline for submissions is March 1 every year, admission decisions are often made before the deadline.

THE DOCTORATE PROGRAM OF MANAGEMENT INFORMATION SYSTEMS (MIS)

is designed to foster students' natural curiosity and enhance their ability to conduct meaningful and rigorous research. Our MIS group is committed to providing a supportive and collaborative research and teaching environment. From the first semester, PhD students are actively engaged in research projects with renowned faculty members. Throughout the program, students will develop essential research skills and gain hands-on experience with real-world projects under the guidance of leading researchers in the field.
